

Re: Road Upgrade to Syne Road, Seys Line and Island View Road

“Whereas the property owners on Snye Road, Seys Line and Island View Road in North Kent will submit a petition to Council on February 12th for road upgrade to these three roads;

And Whereas this route serves as the only multiple daily access point (24/7 use) for the Wallaceburg Water Treatment Plant raw water line, intake and pumping station;

And Whereas these three roads represent the highest assessed residential and agricultural value in Chatham-Kent (over \$7,000,000 in assessed value) still serviced by a gravel road;

And Whereas residents living on this road also represent significant agricultural, commercial and industrial assessment in both Wallaceburg and North Kent (Taylor’s Variety, St. Clair Technologies, Cogghe’s Marina, MPower, Ecarte Marina etc.);

Therefore be it resolved that this request for road upgrade be forwarded to Chatham-Kent Engineering for a report back to Council and area residents by no later than June 2018 on:

1. Detailed costing for any viable alternatives for the upgrade;
2. Recommendations on how the costs should be paid and/or financed; and
3. Any other matters that Chatham-Kent Engineering deems necessary.

Furthermore, when the report from Chatham-Kent Engineering comes before Council, that the petition organizers (on behalf of local residents) be invited to make a presentation to Council on that date.

Signed: Councillor Joe Faas

Notice Given On: January 29, 2018
