

Motion

Re: Pedestrian Activated Cross Walk

“Whereas Chatham St. N. in Blenheim experiences a significant amount of vehicular traffic as well as pedestrian traffic generated primarily by the adjacent grocery store, commercial businesses and residential dwellings, and;

Whereas the only controlled crossing for pedestrians wishing to cross Chatham St. North to access west side businesses from the west side is in the opposite direction at the intersection of Talbot and Chatham., and;

Whereas the eastern sidewalk terminates at the rail crossing.

Be it therefore resolved that administration proceed with the installation of a pedestrian activated cross walk between the intersection of Anger and Chatham and the end of the eastern sidewalk to be funded from strategic reserves.
